

what our customers say about curtis universal joints

In the past, we've had problems with joints (that) fell apart when the lock ring was omitted by error after reassembly. This is not possible with the Curtis joint, because one can readily see if the ring is in place or not."

*Ohio manufacturer of pumps
for molten aluminum*

"The TakeApart design is extremely convenient and practical."

*New York paper bag
machine manufacturer*

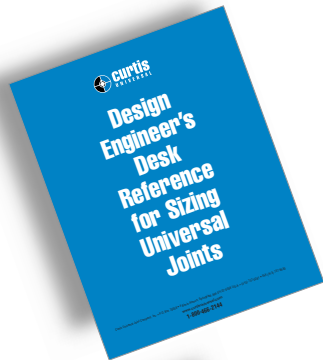

"The ability to take apart the joint is a big advantage for us. It allows us to modify the joint at our own facility to save time and money."

Illinois manufacturer of fork lift trucks

"The Tell-Tale Lock Ring feature is the only way to go. It solved all our problems."

*Kentucky nut runner manufacturer
struggling with a screw-together design
that loosened up during use*
